

**ADDENDUM  
EXHIBIT B**

**REVISED** February 23, 1994

YOLO-SOLANO AIR QUALITY MANAGEMENT DISTRICT  
INFORMATION LISTING AND EVALUATION CRITERIA

SECTION I.      List of Required Information

- A. Name and address of business and responsible person(s) for the application.
- B. Statement of the project and facility(ies) involved including permit status.
- C. Description of the facility including plot plan, boundaries, buildings, process units, equipment, warehouses and storage areas which may cause or contribute to air pollution.
- D. Description of the processes and operations performed in the application including kinds and amounts of materials used and stored, processing and operation parameters, material flow diagrams, operating schedules and levels, design capacities and material transport.
- E. Description of all emission points and corresponding emissions to ambient air for all pollutants for which there are air quality standards, including exhaust temperatures, concentrations, velocities, and height above ground level.
- F. Description of all air pollution control equipment for all pollutants for which there are air quality standards and operating measures proposed to limit air pollution including types, sizes, manufacturer's data and performance parameters for equipment.
- G. Description and use of all fuel-burning equipment including amounts, kinds and analysis of fuels to be used, associated air pollution control equipment, any operating procedures and expected efficiencies.
- H. Ambient air data useful towards determining impacts of emissions including ambient measurements and impact calculations.

- I. Any planned emission reductions from the facility under application including kinds and amounts of emissions, process units and equipment involved and reduction or net changes in emissions from the facility.
- J. Any other public hearing or presentations to other public agencies involving the facility under application.

SECTION II. Criteria for Evaluating Applications

- A. The application must provide information to determine that all emission limitations including visible limitations, exhaust concentration limitations, mass limitations, and nuisance provisions in the District Rules and Regulations will be met.
- B. The application must provide information to determine that ambient impacts can be estimated and air quality standards achieved and maintained.
- C. The application must provide information to determine if all applicable State requirements are met.
- D. The application must provide information to determine if all applicable Federal requirements will be met.

SECTION III. Facilities Subject to the Provisions of Rule 3.8, FEDERAL OPERATING PERMITS

- A. In addition to the information required by Sections I and II, above, an applicant subject to the provisions of Rule 3.8, FEDERAL OPERATING PERMITS, shall use the forms listed in the Rule 3.8 Application Form Package Completeness Criteria to apply for:
  - 1. Initial permit;
  - 2. Permit renewal;
  - 3. Significant permit modification; or
  - 4. Minor permit modification.
- B. The application forms must provide the information specified in the Rule 3.8 Application Form Package Completeness Criteria. Sufficient information must be included to ensure compliance with all

applicable District, state, and federal requirements.
